

SUPERSEDED (2026-09-06): this legacy rulebook is **superseded by** [\[\[TorqBall — Rulebook\]\]](#) — the current, standalone-event rulebook is now authoritative for TorqBall. This doc predates the "each game is its own standalone event" lock and still carries merged-day language (Zone A, "switch the arena to Sumo/Capture in 3–5 min", climax-alongside-Sumo) that has since been replaced. Kept on disk for colour/history only — do not build or run from this doc; read [\[\[TorqBall — Rulebook\]\]](#) (plus [\[\[TorqBall — Ball & Boards Test\]\]](#), [\[\[TorqBall — Boost & Attachments\]\]](#), [\[\[TorqBall — Stretch Modes\]\]](#) and [\[\[TorqBall — What The Event Needs\]\]](#)) instead.

TorqBall — Rulebook (Phase 1A)

Grade: Best · **Role:** Hero (the poster + reel) · **Basically:** Rocket League with RC buggies · **Zone:** A (Flat Multi-Mode Arena)

The flagship. Everything about it is tuned for one thing: the shot. Simple enough that a first-timer scores in their first match, chaotic enough that the overhead camera never stops eating.

1. Objective

Two teams push a large light-up ball into the opponent's goal. Most goals when time expires wins.

2. Format

- **Teams:** 2v2 (default) or 3v3 (peak-hour, bigger crowd energy).
- **Match length:** single 3-minute running clock (or first to 3 goals, whichever first). Peak hours: 2-minute matches to move the queue.
- **Structure across the day:** open casual matches → optional mini-cup bracket in the afternoon → a "TorqBall Cup" final near close (crowd climax candidate alongside Sumo).
- **Rotation:** losing team rotates out, winner stays max 2 matches then rotates (keeps queue fair + fresh faces on camera).

3. The arena

- **Pitch:** flat turf rectangle, ~10×6.5 m (≈700 sq ft, corrected 2026-09-06 — 65 sq m ≈ 700 sq ft, was mis-printed as ≈650 sq ft) — the largest Zone-A footprint; every other Zone-A game fits inside it.
- **Markings (tape only, no floor damage):** centre line, centre spot, two goal areas.
- **Goals:** 2 lit goal mouths, ~1.2–1.5 m wide, low back-net/wall so the ball stays in. Light-up frame for content + clear scoring.

- **Walls:** full perimeter barrier (Clik-Trak or foam) — ball and cars ricochet, no out-of-play stoppages. Rounded/covered corners so cars don't snag.

4. Equipment

- **Ball:** oversized light-up ball, 60–80 cm, lightweight foam or inflatable so a 1/16 can actually move it. **2–3 spares** (they get punctured/deflated).
- **Cars:** speed-limited 1/16 rentals, rubber tyres, front push-bumper. Team colours by LED or coloured tape.
- **Per match:** 4–6 cars charged + on-deck; swap to charged cars between matches (never mid-match).

5. Match flow (marshal script)

1. **Set:** cars on their own halves behind the centre line; ball on centre spot.
2. **Kickoff:** marshal countdown "3–2–1–GO", clock starts, both teams charge the ball.
3. **Play:** continuous; ball off a wall stays live. No offside, no positions.
4. **Goal:** ball fully crosses the goal line → marshal calls it, adds to score screen, **reset:** ball back to centre spot, cars to their halves, kickoff again.
5. **Stuck ball** (jammed in a corner/car pile): marshal 3-count, then free-drop the ball at the nearest neutral spot, no whistle stoppage of clock unless a car flips.
6. **Flipped/dead car:** marshal rights it in place; play continues (no pause) unless it blocks the goal mouth — then quick dead-ball reset.
7. **Full time:** hooter; highest score wins. **Tie** → **60-second golden-goal** or a 3-shot "penalty push" (one car vs empty goal from centre) for content.

6. Scoring & fouls

- **Goal = 1 point.** Own-goals count for the opponent (crowd loves it — keep it).
- **No hard fouls** (it's push-based, contact is the point). Only marshal intervention: deliberate ball-holding against a wall for >5 s = free-drop to the other team.
- **Marshal is final** — no reviews. Keep it fast.

7. Safety

- Speed-limited cars only in this game (beginners + a ball + a scramble = collisions).
- Marshals never enter the pitch with a car live at speed near them without calling "hold"; drivers ease off on "hold".
- Spectators behind barrier; ball is light/soft so an over-the-wall ball is harmless.

8. Content cues (this is the hero — direct the shots)

- **Overhead/wide cam locked on the pitch** the whole match = the signature Rocket-League scramble.
- **Onboard FPV** on 1–2 cars for the ball's-eye chaos.
- Mic the **commentator** on goals; cut goal + celebration for reels.
- Coloured LEDs + light-up ball/goals = the night-glow poster frame.
- Capture: first-timer scoring their first goal (reaction), the pile-up, the golden goal.

9. Variants (keep in pocket)

- **TorqBall Blitz:** 1v1, 90 s — fast filler when the queue is short.
- **Bumper Cup final:** 3v3, two 3-min halves, full commentary — the afternoon showcase.
- **Trick shot hour:** open pitch, one car, big empty goal — pure content, no competition.

10. Reset/turnaround (for run-of-show)

- Between matches: swap to charged cars, ball to centre, teams cycle — **~60–90 s turnaround**. No surface change.
- To switch the arena to Sumo/Capture/Balloon: **remove goals + ball, add that game's props** — surface stays. ~3–5 min prop-swap, done between scheduled blocks, not mid-block.
