

# TorqWars — Game Index

Every game, one page each — then a clickable library of every document.

Each game below is a standalone RC party-game event. Click any document in the library at the end to open that PDF on this computer. Live shareable cards are linked per game.

| Game        | It's basically                            | Status          |
|-------------|-------------------------------------------|-----------------|
| TorqBall    | Rocket League with RC buggies             | Best · The Hero |
| TorqFall    | Fall Guys with RC buggies                 | Best · Event #1 |
| TorqSiege   | Castle build-and-smash with RC cars       | Prototype-gated |
| TorqCapture | Call of Duty objective modes with RC cars | Prototype-gated |

# TorqBall

Rocket League with RC buggies

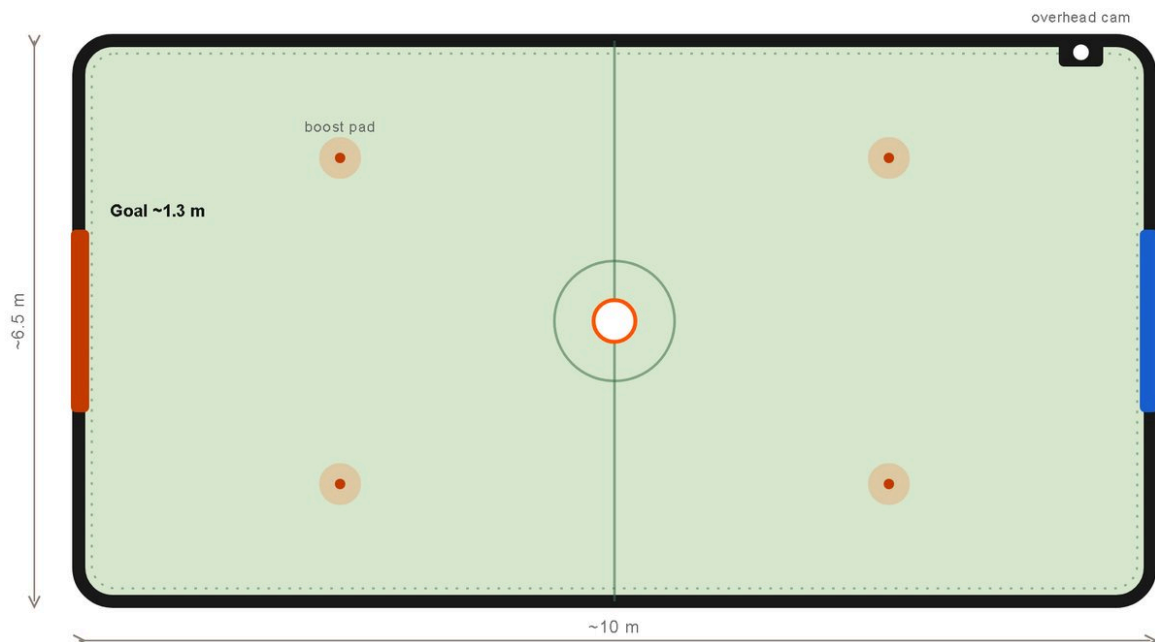

Best · The Hero

- ◆ 2v2 / 3v3 push a big glowing ball into goals on a boarded pitch — rebounds are the game.
- ◆ A tournament: group stage → knockouts → a crowned Grand Final.
- ◆ Our own boost system (Plow / Scoop / Grabber / Turbo / Magnet), earned on floor pads.
- ◆ Modes: Standard · Duel · Big Party (+ stretch Hoops / Puck / Rumble).
- ◆ Prototype gate: the ball + the boards.

## TorqBall — boarded pitch

**TORQWARS**

Standard 2v2/3v3 · ~10 × 6.5 m · dasher boards + 2 goals + boost pads

Pit lane + drivers' stand + boost rack

boards = the one real build · foam-faced plywood, radius corners

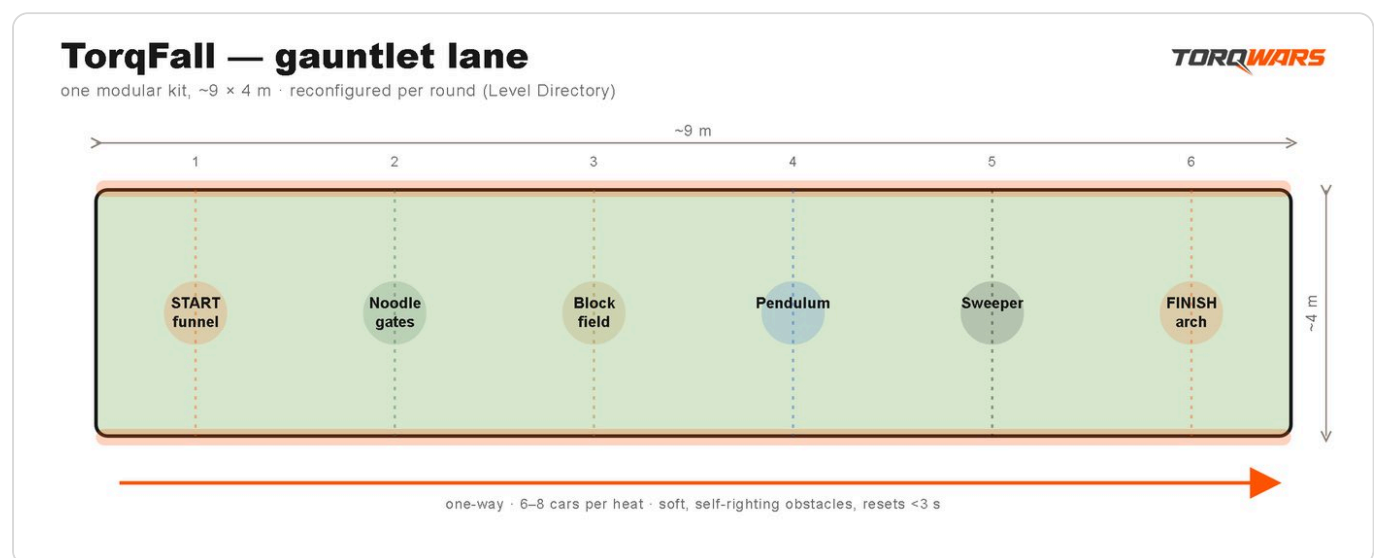

Live shareable card → <https://yash1402r.github.io/torqwars-cards/torqball.html>

# TorqFall

Fall Guys with RC buggies

Best · Event #1

- ◆ 6–8 cars charge a soft-obstacle gauntlet — bump, pile up, survive.
- ◆ Race mode or survival; non-elim qualifying → bracket → Grand Final (a smashable Collapse Gate finish).
- ◆ A 21-round library from ONE modular kit, shuffled so no two events repeat.
- ◆ Ready to run first — cheapest, lowest-risk, nothing to prototype.

Live shareable card → <https://yash1402r.github.io/torqwars-cards/torqfall.html>

# TorqSiege

Castle build-and-smash with RC cars

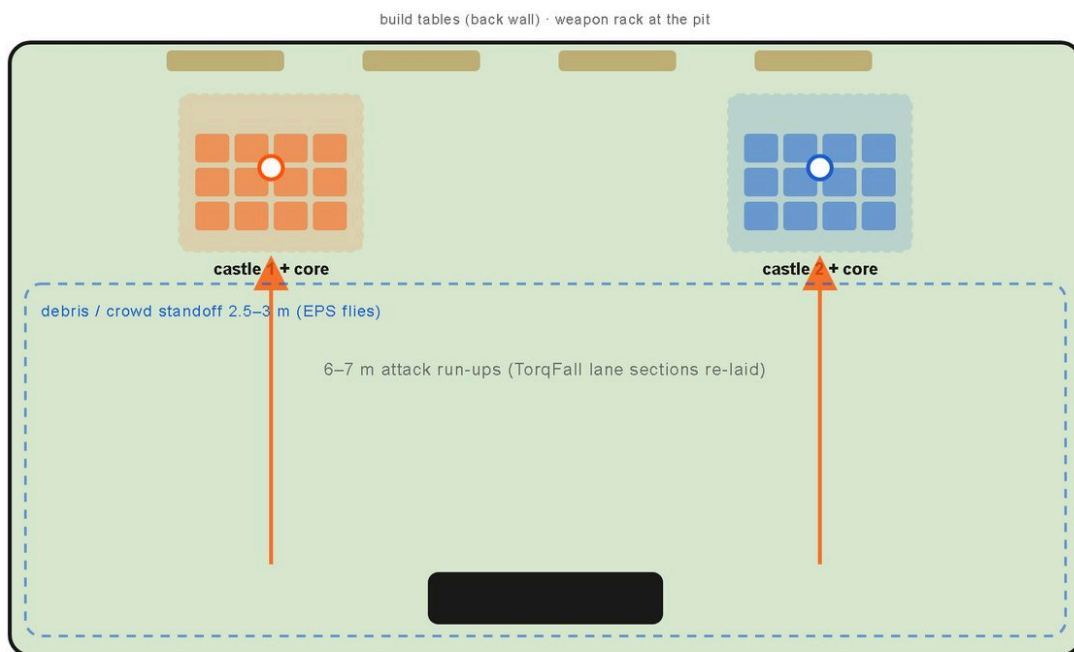

Prototype-gated

- ◆ Teams build a castle from foam + cardboard, opponents smash it — topple the core to win.
- ◆ A never-stops loop: Build → Siege → Reinforce → Siege → Final.
- ◆ Earn / choose 3D-printed or DIY weapons (wedge, ram, grapple).
- ◆ Gated on a one-afternoon collapse test — build nothing until it passes.

## TorqSiege — siege arena

2 castle zones + run-ups + a debris standoff · reconfigures TorqFall's kit

**TORQWARS**

Live shareable card → <https://yash1402r.github.io/torqwars-cards/torqsiege.html>

# TorqCapture

Call of Duty objective modes with RC cars

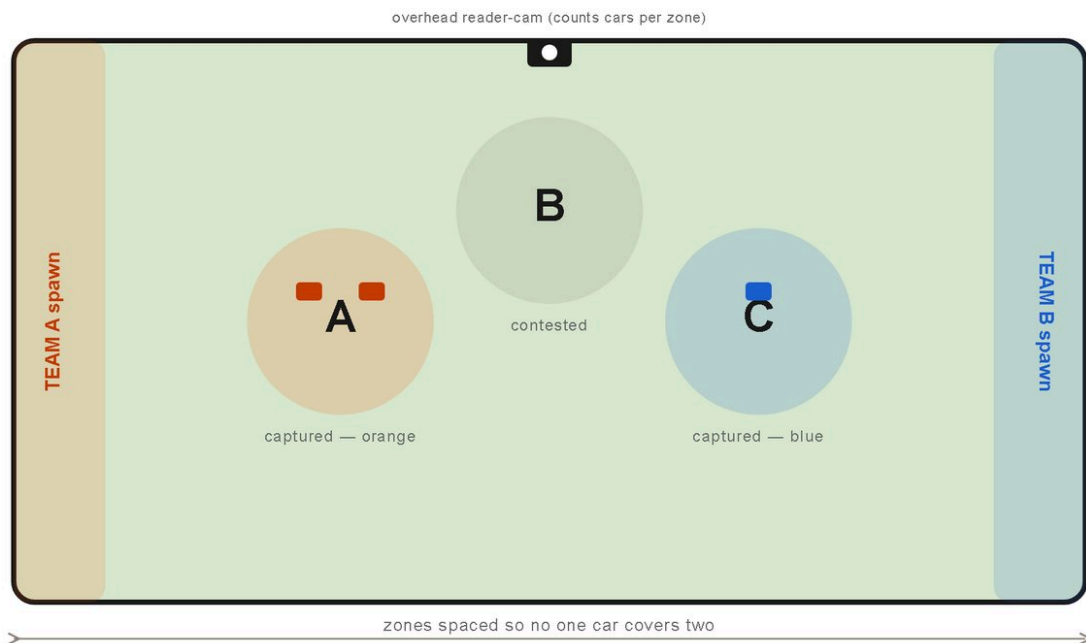

Prototype-gated

- ◆ Two teams fight over glowing zones — occupy, out-number, shove to hold the ground.
- ◆ Count → hold the majority → the ring flips your colour and ticks points.
- ◆ A 5-mode COD playlist: Domination · Hotzone · The Hill · Siege Point · Courier.
- ◆ Scored by tech (tag + zone reader / overhead cam); absorbs the old Capture the Zone.
- ◆ Gated on a zone-scoring bench test.

## TorqCapture — Domination layout

TORQWARS

3 zones A/B/C · hold the majority 5 s to flip · own 2 of 3 = winning

Ownership = the team with MORE cars inside · equal or empty = contested (the flip-timer pauses).

A captured ring keeps ticking even after you roll off — until the enemy out-numbers you and completes a fresh 5 s flip.
